

The flower wall made from an old bed

Everyone surely has his own favorite flowers, which is desirable to hung on a wall. To do this you will have to drill a lot of holes for the numerous hooks. I propose an original way how to make this without "noise and dust" using the old unnecessary bed.

Such a flower wall will decorate any room or patio.

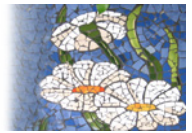

The old bed is disassembled twisting off its back and legs. We need only the bedside itself, which is painted with a ground color.

Put the bed to the wall and affix it with two metal corners.

Mosaic, Decoupage, Painting

Hang the lengthy pots on special hooks or simply fasten them to the bedside rails using self-drilling screws.

Pour the ground and plant your favorite flowers.

Do not rush shaking off the old bed. Walk around it , look at it from different angles. Possibly, you will invent some original ideas how to adapt it for the home decoration.
